INTRODUCTION

These exercises are meant to keep you practicing thing we learn and what we are about to learn in the course. If you don't know how to solve any of the exercise, please first see the solution and try to figure it out, and if you still don't know how to solve them, please contact me.

The main goal of these exercises is for you to get familiar with HTML and CSS. So, as I said earlier if you get stuck on one, please first see the solution, and continue to the next one. Best way to learn is to practice coding

16               Voltaire, a French philosopher and historian who died shortly after the American revolutionary war, left us
17               with this warning about translations: "Woe to the makers of literal translations, who by rendering every word
18               weaken the meaning! It is indeed by so doing that we can say the letter kills and the spirit gives life." Despite
19               his warnings, we bring you four translations of the phrase "Hello World".
